PROJECTS

Where'sMySeat – Movie Ticket Booking Web App

Mar 2025 - Apr 2025

GitHub : <https://github.com/Suresh-web-dev/Movie-Ticket-Booking-Project.git>

- Developed a full-stack web application for booking movie, event, and sports tickets with user authentication and admin functionalities.
- Signup/login, movie/event/sports browsing, dynamic search, and booking with confirmation screens.
- Admins can upload movies, events, sports, and cinemas.
- Users can search by title or cinema name across different categories.
- Users can select movies/events/sports, choose cinemas, and complete booking with success confirmation.
- Managed using Django ORM, handling user data, bookings, and uploads (movies, events, sports).
- Developed using **Django, Python, Sqlite, HTML, CSS, and JavaScript** technologies.

Job Finder Web Application

Feb 2025 - Mar 2025

GitHub : https://github.com/Suresh-web-dev/Job_Finder_Project.git

- Developed a comprehensive Job Finder web application using Django, enabling users to post jobs, apply for positions, and manage their accounts.
- Created models for job listings, user sign-ups, login credentials, and job applications.
- Implemented user authentication (login, signup, and logout) using Django's built-in authentication system.
- Enabled employers to post job openings and job seekers to search for jobs by name.
- Utilized Django's ORM for managing job listings, user accounts, and application data.
- Developed using **Django, Python, Sqlite, HTML, CSS, and JavaScript** technologies.
